

MIREU

MINING AND METALLURGY REGIONS OF EU

A NETWORK OF MINING AND METALLURGY REGIONS

The EU project MIREU aims to establish a network of mining and metallurgy regions across Europe. The main objective of the project is to identify ways to ensure the sustained and sustainable supply of mineral raw materials to the EU and to promote investment, innovation and growth in the sector. The MIREU project will bring together European mining and metallurgy regions to work together on improving conditions for the responsible development and secure supply of raw materials in the EU. The regions will share their experiences and knowledge to help tackle the fundamental challenges of establishing and maintaining an extractive industry. The current MIREU Network comprises 17 regions from 14 European countries. Chile is also represented in the network.
